Stuart, with all due respect, what you say about Luxon contracts what is out there in the public domain. For example:

Hi Julian,

I am sure you are right that the protesters do want to debate the facts because they do not support their proposition.

I would have to see the context of your video but it simply does not fit with our policy. It is true that some Treaty settlements have included co-management arrangements such as the Waikato River bed, and it is true that co-management and co-governance are used interchangeably but they are quite different concepts.

I stood beside Christopher Luxon in the Marlborough Events Centre in front of 450 people where he said we do not support co-governance and we will repeal any such provisions should we be elected.

Thanks,

We are being disrupted by protesters at every event.

Good afternoon Julian,

Unfortunately, I was unable to attend your meeting in Renwick last Sunday but I understand may have been disrupted by protesters, is that so?

Regards,
